MOULDS EVENT 2025
SEMANA MOLDES

Bridging Ideas, Building Futures

Welcome to BROKERAGE EVENT 2025!

The Brokerage Event 2025, held in the framework of MOULDS EVENT 2025, is a strategic international forum dedicated to fostering collaboration, innovation, and the creation of new European projects. Taking place on November 25th, 2025, the event combines a presentational morning program with an online afternoon session, offering participants the best of both worlds: direct interaction, dynamic discussions, and global matchmaking opportunities.

The event aims to:

- Support the launch of international R&D and innovation projects
- Foster business partnerships and innovation ecosystems with added value
- Promote the generation and transfer of technological solutions across sectors

The presentational session will feature three parallel thematic rooms, each moderated to drive constructive dialogue and spark collaborative ideas.

In the afternoon, the focus shifts online, extending participation to a wider international audience. Two main activities will take place: a Pitching space, where participants share project ideas or partnership needs in concise slots, and B2B bilateral meetings, organized through the online platform.

With its clear alignment to the Horizon Europe framework and in close collaboration with the RPD – Rapid Product Development conference, the Brokerage Event 2025 continues a long tradition of partnership-building supported by the European Tooling Platform and the EUREKA Initiative. Since its first edition in 1998, the event has proven instrumental in enabling the creation of international innovation projects, business ventures, and cross-border partnerships.

By anticipating upcoming calls within national, regional, and European programs, the Brokerage Event 2025 positions itself as a key platform to build international consortia, foster collaborative research, and accelerate the launch of innovative projects.
